PERSONAL PRIDE -CONSTRUCTION-

“OFFERING YOU OUR PERSONAL BEST FOR THE PRIDE OF YOUR HOME”

Thank you for choosing Personal Pride Construction for all of your home renovation needs. We are looking forward to assisting you throughout the entire construction process to ensure all of your needs are being met and your questions are answered.

We would like to remind you that we are a locally owned and operated company based in Golden Valley, MN with regional offices in North Mankato and Rochester. Our licensing, insurance, and bonding meet or exceed all local regulations. We use only the highest quality building materials and subcontractors on your home guaranteeing you receive the highest quality service.

For your convenience, we have put together a short list of items to expect during construction and how to prepare for them.

Roofing

- ✓ Vibrations caused from replacement of your roof may cause minor debris to fall into attic spaces or directly into living spaces (if there is no attic or ceilings are vaulted). This situation is very unlikely, but please remove or cover any items located in these areas.
- ✓ During the roofing process, debris may fall off the roof. Please move all grills, patio furniture, or other items located along the roof line of your home to prevent any damage. Tarps will be placed around the perimeter of your home and additional care taken to help prevent damage to any plants or other items that cannot be moved.
- ✓ If you have a satellite dish, the signal may be disrupted, and the dish may need to be reset by a representative of your provider. This is normal and funds are allocated to taking care of this expense for you if needed.

Siding

- ✓ Replacement of the siding on your home will cause a significant amount of vibration along the exterior walls of your home. To avoid any damage, all pictures, shelves, mirrors, etc. that are located along these walls must be taken down and moved away from affected walls.
- ✓ As part of the siding replacement, all exterior lights, doorbells, a/c units, and utility boxes must be detached and reset after the new siding is installed. This may cause outages of these services. The outages are only temporary, and the services will be restored as soon as possible.
- ✓ In rare situations, a fuse may get tripped and will need to be reset. You may locate the tripped fuse in your breaker box and reset it or contact your Claims Specialist for further assistance.

If you need any help moving items or have any other concerns regarding the construction process, please contact your Personal Pride Construction Claims Specialist to assist you.
